Materials:

Construction paper or heavy cardstock
Clock hat templates
small metal brads
scissors
stick glue
crayons, markers, or colored pencils
clear tape (optional)

Directions:

1. Print out the clock hat templates onto construction paper or heavy cardstock. I just cut some construction paper to 8.5 x 11 size and ran it through my printer.
2. Cut out and assemble the hat by gluing or taping the ends together to make a circular hat. You might want to put the hat around your student's head first to get an idea of what size it should be. I've included some extra bands in case you need to make the hat larger.
3. Cut out and assemble the clock face and hands, securing them on the hat with a small metal brad. I made the clock hands out of construction paper, too.
4. Have your student fill in the digital time on the small rectangular clocks to match the time written in words.
5. Student colors the small rectangular clocks, cut them out, and glue them around the band of the hat in order. We started at one o'clock and ended at 12 o'clock.

A fun way to use this hat to assess student learning is to ask them to show you certain times on their hat. For example, you might ask them to show you a specific time (2 o'clock or half past three). Students could take off their hats so they could see the clock and move the hands, and then put it back on when they've got the correct time. You might also ask them to show you what time they get up in the morning or what time they eat dinner. It's an easy and fun way to get them using a clock to show and read time. If you're in a classroom or small group setting, these hats could be really handy because you could easily glance around the room, see the times on their hats, and know if the child has answered correctly.
